

Conference phones for every situation

Konftel 200W – the DECT conference phone for versatile meetings

The Konftel 200W is a conference phone specially designed for companies that have a DECT infrastructure. It can be connected to existing GAP-compatible DECT systems or a Konftel DECT base station. With easy-to-use functions and optional extra microphones, the Konftel 200W is ideally suited for meetings in larger conference rooms.

KONFTEL FEATURES

- **OmniSound®** – crystal clear sound
- **Natural sound** – in both directions (full Duplex)
- **2-year guarantee**

KONFTEL 200W FEATURES

- **A practical unit, simple to connect and use**
- **Cordless connection to GAP-compatible DECT systems**
- **Large, illuminated display**
- **Keypad**
- **User-friendly menu system**
- **Tape recorder output**
- **Expansion microphones and remote control as optional**

Now you can hold a meeting anytime – regardless of distance and pressing schedules. Konftel makes telephone conferencing the ideal alternative, providing an opportunity to bring people together and hold spontaneous meetings to reach instant decisions. Konftel conference units are all equipped with the unique OmniSound® feature – optimal sound for totally natural, crystal clear communication.

Convenient conferencing!

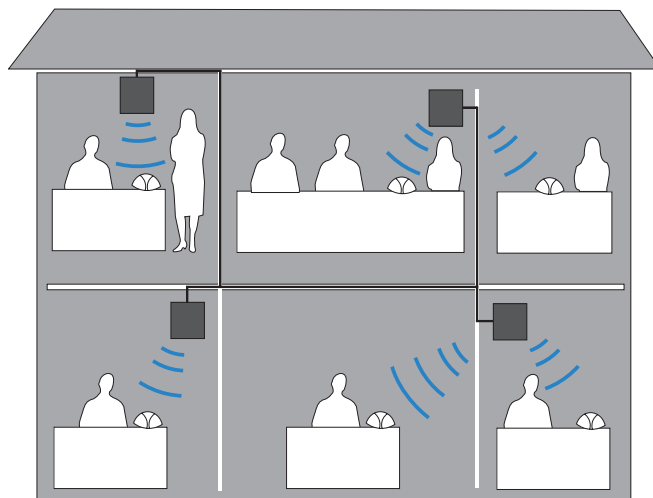

The Konftel 200W is a conference phone that opens up your office. It connects cordlessly to the majority of DECT systems providing greater versatility. As a result, the unit can be used to hold phone meetings practically anywhere in the building, without being restricted to phone sockets. For an instant meeting, simply plug in the power connector and make your calls.

Konftel can also supply a base station to offices that do not have a DECT system. The Konftel DECT base station can be connected to an analogue output and provides cordless connection up to 300 metres. Cordless handset units can also be connected to Konftel DECT base stations.

User-friendly functions

The Konftel 200W has a keypad with a mute button, an R-button for multi-party calls and a menu button. The menu system and base station radio coverage appear in the clear, illuminated graphic display. Choose which base station you want the Konftel 200W to be connected to by using the menu system. Plus the phone book can store up to 50 contacts, along with the last called number, volume settings for the loudspeakers, date, time and call time.

Ideal for larger meetings

Expansion microphones can be connected to the Konftel 200W to provide increased range and optimal sound conditions in larger meeting rooms. The loudspeaker volume level increases automatically and the range doubles, from 30 m² to 70 m². This provides superlative sound quality. The optional remote control adds further ease to meetings, allowing you to control all the Konftel 200W functions such as the speed dialling buttons for the most frequently used phone numbers.

OmniSound® – crystal clear sound

Walk and talk freely around your room with consistently high quality sound. There is no irritating sound clipping, damping or echoes. OmniSound® produces natural sound in both directions (full Duplex) as well as 360° sound pick-up and reproduction. An ultra-sensitive microphone provides omni-directional sound pick-up and three built-in surround speakers provide crystal clear sound through the room.
